IP Rating Chart

IP ratings are represented by combining the first and second digits of the following columns. See example below.

1st Digit - SOLID Degree of protection against solid objects		2nd Digit - LIQUID Degree of protection against water			
	No Protection	0		No Protection	0
	Protected against a solid object greater than 50mm, such as a hand.	1		Protected against water drops.	1
	Protected against a solid object greater than 12.5mm, such as a finger.	2		Protected against water drops at a 15 degree angle.	2
	Protected against a solid object greater than 2.5mm, such as a wire.	3		Protected against water spray at 60 degree angle.	3
	Protected against a solid object greater than 1.0mm, such as a thin strap.	4		Protected against water splashing from any angle.	4
	Dust Protected. Prevents ingress of dust sufficient to cause harm.	5		Protected against water jets from any angle.	5
	Dust tight. No ingress of dust.	6		Protected against powerful water jets and heavy seas.	6
Example:  IP 6 5 Protected against water jets from any angle. Dust tight. No ingress of dust.			Protected against the effects of temporary submersion in water. (30 minutes at 3 feet)	7	
			Protected against the effects of permanent submersion in water. (Up to 13 feet)	8

To - Tasmania - Darwin - Regional Country Australia Wide

Ring to obtain a freight quote for delivery to a commercial or private address of the end customer.

If freight is going to a private address we must receive a written "authority to leave" confirmation from the end customer with your order, stating that the freight company can leave the shipment at the detailed location if no one is present.

Note - If for whatever reason freight delivery requires more than one attempt, extra freight charge will apply.

* To The Customer *

It is important that we and our retailers advise our clients of the unique characteristics of our products. As our products are hand made and finished, they will not be perfect and we see this as their unique appeal.

Therefore -

- Metal castings and extrusions will have imperfections in the surface. Lamp holders may not be perfectly straight.
- Hand welding will not be perfectly straight and there may be surface finish imperfections due to chemical plating & hand finishing.
- Hand-blown glassware may have bubbles, pin dots, slight lines, rippling, cut edges & be slightly off center.
- Paint color will vary from batch to batch & in case of hand painted finish, each product will be marginally different.

* Please Note *

- * All items are inspected for visible defects before dispatch, we therefore also recommend the retailer does the same before giving to their customer in case of damage in transit. If not inspected, Lode Int. will not accept liability for installation or any other claims for visibly faulty goods. Report any breakage or faults immediately before giving to your customer for replacement parts or fitting.
- * We will not recognize or accept any unreasonable claim relating to the unique characteristics of our hand made products.
- * Products can only be returned if unopened and in original packaging.
- * Products modified to customer request may not be returned.
- * Products ordered separately over time may not match exactly because of color batching or manufacturing changes. No claim related to separate ordering over time will be recognized.
- * Products can change or vary without notice.
- * Images are the property of Lode International. Images of products are illustrative only. There use is only permissible with written consent.
- * Lode International is not liable for damage/altering the integrity of the light fittings due to faulty globes.
- * Lode International is an accredited E.R.A.C  "Responsible Supplier"
- * Type of [globe required chart](#) and [IP rating chart](#) on [Page 97](#).
